MONTHLY DIGEST OF STATISTICS

No. 288

DECEMBER 1969

U. of ILL. LIBRARY

FEB 26 1970

CHICAGO LIBRARY

LONDON : HER MAJESTY'S STATIONERY OFFICE

Price 8s 6d [42½p] net

Increase in price

It is regretted that owing to increased costs of production the price of the *Monthly Digest of Statistics* will have to be raised, from the January 1970 issue, to nine shillings net.

The annual subscription will be £6 0s 0d including Supplement of Definitions and postage.

MONTHLY DIGEST OF STATISTICS

No. 288

DECEMBER 1969

1. This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

2. The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

3. The figures in the *Digest* are mainly totals for calendar months or monthly averages.

4. Some of the figures included in this *Digest* are provisional only and may be revised in later issues.

Definitions

5. A *Supplement of Definitions and Explanatory Notes*, published with the January issue, gives detailed definitions of all the terms and units used in the *Digest*.

6. The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Gallon = imperial gallon.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are normally defined in detail in the *Supplement* to the *Digest*. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

7. *Symbols.* The following symbols are used throughout:

.. not available.

— nil or less than half the final digit shown.

* average (or total) of five weeks.

8. *Change of basis.* A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

9. *Rounding of figures.* In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Change in content

10. *Table 23. Registered unemployed: Analysis by regions.* The figures are now analysed by Standard Regions.

Table 150. Bank of England. An additional column showing 'Other assets' has now been included in the part of this table covering the Issue Department. The bank rate is now given as a separate table.

Table 155. Discount market. 'Local authority securities' and 'Negotiable certificates of deposit' are now shown separately instead being included in 'Other assets'.

Table 159. Bank rate. The figures are now given in this new table instead of being included in Table 150.

Central Statistical Office,
Great George Street, S.W. 1.

19th December 1969

CONTENTS

Table Page

I. National income and expenditure

Expenditure on the gross domestic product	1	4
Factor incomes in the gross national product	2	5
Index numbers of output at constant factor cost	3	6
Personal income, expenditure and saving	4	7
Consumers' expenditure	5	8
Value of physical increase in stocks and work in progress	6	9
Gross domestic fixed capital formation	7	10
Fixed capital expenditure in manufacturing industry	8	12
Fixed capital expenditure in the distributive and service industries	9	13

II. Population and vital statistics

De facto or home population	10	14
Age distribution of the population	11	14
Births, marriages and deaths registered	12-13	15

III. Labour

Distribution of working population	14	16
Employees in employment: All industries	15	17
Employees in employment: Index of production industries	16	18
Civil Service: Non-industrial staff	17	20
Civil Service: Industrial staff	18	21
Numbers employed in agriculture	19	21
Constructional work: Operatives employed by contractors	20	22
Overtime and short-time worked by operatives in manufacturing industries	21	22
Registered unemployed	22-27	23
Employment vacancies filled and unfilled	28	27
Industrial stoppages	29	28

IV. Social services

National insurance and family allowances	30	29
Supplementary benefits: pensions and allowances	31	30
National health service	32	31

V. Agriculture and food

Crops and grass: Area and harvest	33	32
Livestock, pigs and poultry on agricultural holdings	34-35	33
Production, disposals and stocks of principal foods and feedingstuffs	36-44	34
Tobacco	45	40
Alcoholic drinks	46	41
Estimated household food expenditure and consumption in Great Britain	47	42

VI. Production, output and costs

Index of industrial production	48	44
Output per head	49	46
Indices of home costs and labour costs	50	47

VII. Fuel and power

Coal: production, consumption and stocks	51-55	48
Coke: production, disposals and stocks	56	52
Production of gas	57	53
Generation of electricity	58-59	54
Petroleum and petroleum products	60-65	56

VIII. Chemicals

Fertilizers	66	59
Sulphur and sulphuric acid	67	60
Synthetic dyestuffs, colours, paint and varnish	68	61
Synthetic resins and plastics materials	69	62
Other miscellaneous products	70	62

IX. Metals, engineering and vehicles

Iron and steel	71-73	63
Non-ferrous metals	74-75	65
Mechanical and electrical engineering products	76-87	66
Radios, radiograms and television sets	88	72

Deliveries of electrical equipment and appliances	89	73
Merchant shipbuilding	90-91	74
Vehicles	92-95	76

X. Textiles and other manufactures

Textiles and hosiery	96-100	79
Leather and footwear	101-102	81
Timber and paper	103-106	82
Rubber and other manufactures	107-109	85

XI. Construction

Industrial building in Great Britain	110	87
Constructional work: Output and new orders	111-112	88
Permanent housing	113-114	90
Educational building in Great Britain	115	92
Building materials and components	116	94

XII. Retailing and catering

Index numbers of retail sales and stocks in Great Britain	117	95
Index numbers of turnover in the catering trades	118	96

XIII. Transport

Road and rail transport	119-125	97
Civil aviation	126	102
Merchant shipping	127-128	104
Passenger movement by sea and air	129-130	105

XIV. External trade

Value and volume	131-133	107
Analysis by source and destination	134-135	110
Imports and exports of selected commodities	136-142	112

XV. Overseas finance

Balance of payments	143	116
Reserves and net liabilities in sterling and in other currencies	144	117

XVI. Home finance

Consolidated Fund and National Loans Fund	145-146	118
Central government Net balance	147	119
Inland Revenue and Customs and Excise duties	148	120
Capital issues and redemptions	149	121
Bank of England	150	122
London clearing banks and Scottish banks	151-152	123
Bank clearings and currency circulation	153	125
Bank advances	154	126
Discount market	155	128
Hire purchase and other instalment credit	156	128
National savings	157	129
Security prices and yields	158	130
Bank rate	159	130

XVII. Wages and prices

Average earnings and hours worked	160-163	131
Indices of wages rates and normal weekly hours	164-165	135
Changes in basic weekly wage rates	166	137
Index of retail prices	167-168	138
Index numbers of wholesale prices	169	140
Index numbers of agricultural prices	170	142
Import and export unit value index numbers; tramp shipping freights	171	143

XVIII. Entertainment

Broadcast receiving licences, cinemas and gramophone records	172	144
------------------------------------------------------------------------	-----	-----

XIX. Weather

Temperature, rainfall and sunshine	173	145
Alphabetical index		146

I. NATIONAL INCOME AND EXPENDITURE

Expenditure on the gross domestic product

TABLE I

£ million

	Gross domestic product at factor cost ⁽¹⁾	Final expenditure on goods and services at market prices							Imports of goods and services	Taxes on expenditure	Subsidies
		Total		Consumers' expenditure	Public authorities' current expenditure	Gross domestic fixed capital formation	Value of physical increase in stocks and work in progress	Exports of goods and services

⁽¹⁾ Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3.

⁽²⁾ This represents taxes on expenditure less subsidies valued at constant rates.

(1) The figures for June 1964(a) and the corresponding figures for earlier months are not strictly comparable with those for June 1964(b) and later months which, for Great Britain, are on the revised basis of calculation (see pages 110-112 of the March 1966 issue of the *Ministry of Labour Gazette*.)

(2) Between June 1966 and June 1967 the industrial classifications of many establishments in Great Britain were corrected. The estimates for June 1967 take account of these reclassifications and the figures for individual industries are therefore not comparable with those published for previous mid-years. Two sets of estimates are given for June 1966 i.e. (a) excluding the effects of reclassifications (for comparison with earlier estimates) and (b) including the effects of reclassifications (for comparison with subsequent estimates).

(3) Figures after June 1968 are provisional, being subject to revision after the count of National Insurance cards at mid-1969.

(4) Orders II-XVIII of the *Standard Industrial Classification* (1958)

(5) Owing to reclassification, figures up to 1963 are not strictly comparable with those from 1964 onwards. See page 59 of the February 1965 issue of the *Ministry of Labour Gazette*.

⁽¹⁾ Established and unestablished staff, excluding employees of the Northern Ireland Government. In arriving at the totals two part-time workers are counted as one whole-time worker.

⁽²⁾ Including the Department of National Savings (15,300) and the Ministry of Posts and Telecommunications (355) from 1 October 1969.

⁽³⁾ Casual or seasonal staff recruited for periods normally of less than six months. These are included in the total and other columns.

⁽⁴⁾ Became a public corporation on 1 October 1969.

⁽⁵⁾ Ministry of Social Security before November 1968.

⁽⁶⁾ Ministry of Labour up to May 1968.

⁽⁷⁾ Ministry of Aviation up to January 1967. In February 1967 the functions of the Ministry of Aviation were taken over mainly by the Ministry of Technology (which was formed in October 1964).

⁽⁸⁾ In July 1966 certain staff of the Ministry of Aviation were transferred to the Board of Trade.

⁽⁹⁾ Including the Ministry of Technology up to January 1967, and Ministry of Health up to October 1968.

(¹) Stoppages involving fewer than 10 workpeople or lasting less than one day have been omitted except any in which the total number of working days lost exceeded 100. The figures for 1969 are provisional.

(²) The analysis by industries is based on the *Standard Industrial Classification 1958*.

(³) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(⁴) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages *in progress* in that period, whether the stoppages began in that period or earlier.

- (1) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.
- (2) Including prescribed industrial disease.
- (3) Yearly figures are averages of twelve monthly figures.
- (4) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.
- (5) Yearly figures are averages of quarterly figures. Quarterly figures relate to first Monday in February, May and November and last Monday in July.
- (6) Including a diminishing number of widows with pensions of 30s. a week derived from the old Contributory Pensions Acts.
- (7) The yearly figures relate to the end of January in the following year in 1963, and to the end of December from 1964.
- (8) Including the elder or eldest child for whom no allowance is payable.
- (9) Average of twelve months March 1966 to February 1967.
- * Average of five weeks.

⁽¹⁾ Pension age means 65 years for men and 60 years for women.

⁽²⁾ Some of the supplementary pensions provide for the requirements of a household with more than one pensioner.

⁽³⁾ Includes a small number of persons over pension age.

⁽⁴⁾ From November 1967, the method of compiling the statistics of the breakdown of the number of supplementary benefits has been revised.

For mowing ⁽⁹⁾	3,078	3,018	2,998	2,872	2,938	3,822	3,880	3,933	3,787	
For grazing	9,060	9,181	9,330	9,323	9,410					
Rough grazings (including common rough grazings) ⁽¹⁵⁾	17,830	17,718	17,639	17,537	17,566					

(¹) Excluding agricultural holdings of one acre or less in extent in Great Britain. In Northern Ireland excluding holdings of less than one acre. (²) Beans only. (³) Gross production figures are shown. (⁴) Includes some production diverted from green peas. (⁵) Weight in pod. (⁶) Shelled weight. (⁷) Excludes rape grown for oilseed in England and Wales. (⁸) England and Wales only. (⁹) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed; the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (¹⁰) Clover and rotation grasses. (¹¹) Includes lucerne. (¹²) Includes hay from permanent grass in Scotland. (¹³) Includes hay from lucerne. (¹⁴) Excludes some 47,000 holdings in England and Wales which make a negligible contribution to agricultural output. This affects comparison with permanent grassland acreage figures in previous years. (¹⁵) Includes the total area of deer forest land in Scotland.

(1) Sales through the Milk Marketing Schemes. (2) Whole and skimmed. Excluding skim concentrates and condensed milk used in the manufacture of chocolate crumb. (3) Skimmed powder excludes buttermilk and whey powder. (4) Figures are based on milk usage. From January 1965 the figures relate to calendar months. (5) Excluding farm production. (6) Stocks held in cold storage. (7) Stocks held by importers, manufacturers and factors. From January 1965, the figures include farmhouse cheese, and from December 1965 coverage of stocks of imported cheese has been extended. (8) Stocks held by manufacturers only; importers' stocks not known. (9) 53 week period.

* Five week period.

⁽¹⁾ This index provides a general measure of monthly changes in total industrial production. The unadjusted index allows for variations in the length of calendar months so that it gives the average weekly rate of production in each month. The seasonally adjusted index allows for holidays and regularly recurring seasonal movements.

As some of the figures on which the index is based are available only with considerable delay, the index numbers for the last few months are always liable to be revised. Industries are grouped according to the *Standard Industrial Classification, 1968*.

⁽²⁾ For an index of construction (new work only) for Great Britain, see Table 111. ⁽³⁾ Provisional.

⁽¹⁾ Stocks held in Northern Ireland are excluded.

⁽²⁾ Including shipments to Northern Ireland and the Channel Islands.

⁽³⁾ From July 1963, the opencast figures include the production of certain licensed sites previously included in the deep mined figures.

⁽⁴⁾ Week ended 30 December 1967 is omitted from the figures.

* Average of five weeks.

(1) Mines operated by the National Coal Board which account for about 99 per cent of the total output. Changes in the basis of the recorded figures have occurred from time to time making comparisons difficult. The figures given in this table have therefore been adjusted where necessary to conform throughout to the current definitions given in the *Supplement of Definitions and Explanatory Notes*.

(2) Week ended 30 December 1967 is omitted from the figures.

* Average of five weeks.

(¹) Excluding coke breeze.

(²) Excluding coke used for heating retorts at gas works.

(³) Including shipments to Northern Ireland.

(⁴) Figures relate to actual shipments made in each period and owing to the time lag between the date of shipment and the notification to H.M. Customs they differ from the figures published in the *Trade Accounts*.

(⁵) Week ended 30 December 1967 is omitted from the figures.

*Average of five weeks.

(1) Excluding quantities used for production of steam for sale. In 1968, 254,000 tons of coal and 16,000 tons of oil were used for that purpose.

(2) Including generation by oil engine, refuse destructor, and waste heat.

(3) Including purchases from industrial producers whose generation is shown in Table 59, and net imports from France.

(4) Annual figures relate to the maximum load occurring near the end of the year or early in the following year.

(¹) Excluding the fuel industries which produced:

Million kilowatt hours

Coal mines (1968/69)	613
Gas works (1968/69)	213
Mineral oil refining (1968)	871

These industries accounted for an average weekly production of about 33 million kilowatt hours in 1968 as compared with 327 million kilowatt hours produced weekly in 1968 by the industries included in the table.

(²) Including non-ferrous metal manufacture and industries covered by Orders VI-IX of the *Standard Industrial Classification*, 1958.

(³) Electricity supplied by United Kingdom Atomic Energy Authority prototype reactors to the public electricity supply system.

*Average of five weeks.

(¹) Excluding natural gas.

Source: Ministry of Technology

(²) From January 1968 agency pick-up sales are included under dealers, and not as previously under commercial consumers. These sales amounted to 5.4 thousand tons (5, 4 and 3 star) and 5.6 thousand tons (other) in January 1968.

(³) From January 1967, all finished motor spirit with an octane number (research method) not less than 94. The figures relate to Premier grades prior to January 1967.

(⁴) The figures relate to Standard grades prior to January 1967. (⁵) Provisional.

(1) Before 1963 figures for paint and varnish relate to sales by manufacturers employing more than 10 persons in 1954, but from 1963 to sales by manufacturers employing 25 or more persons at the beginning of that year.

(2) From January 1963 including clear solutions and pigmented cellulose paints.

(3) From January 1963 the figures relate to spirit-based varnishes, lacquers and stains only.

(¹) The iron content of home produced iron ore is about 28 per cent and of imported iron ore about 60 per cent.

(²) Excluding consumption of refined and cylinder iron made otherwise than in blast furnaces.

(³) At steel works, steel foundries and blast furnaces.

(⁴) At steel works and steel foundries.

(⁵) Ingots, metal for continuously cast blooms, billets and slabs, and metal for castings.

(⁶) Stocks at producers' works of alloy and non-alloy ingots, semi-finished and finished steel in terms of ingot equivalent.

(⁷) Including imports (and material for manufacture of drop forgings) but excluding deliveries of all materials for intra-industry conversion.

(⁸) 53 week period. *Average of five weeks.

⁽¹⁾ Characteristic products of industries in Order VI of the *Standard Industrial Classification 1958*, except ordnance and small arms. Excluding deliveries by the smallest firms which are estimated to be about 2 per cent of the total. In general, spare parts supplied by manufacturers of complete machines are included with these machines, but parts, other than those separately specified, supplied for assembly by makers of complete machines are included in the heading for sub-contract sales and components.

⁽¹⁾ Includes all wheeled tractors as in Table 94 and an estimated number of track-laying tractors of 10 belt horse-power and over for agricultural use.

⁽²⁾ Including combined seed and fertilizer drills.

⁽³⁾ Ex-works value, including items not shown separately in preceding columns, and also parts and accessories.

⁽¹⁾ Excluding the value of work done on research and development. Including sales to H.M. Forces.

⁽²⁾ Including electronic control equipment from the scientific instruments and apparatus industry.

⁽³⁾ Including electronic measuring and testing equipment from the scientific instruments and apparatus industry.

⁽⁴⁾ Transmitters (sound and vision) for public broadcasting and ancillary equipment.

⁽⁵⁾ Electronic heating equipment, industrial television equipment, electronic simulators and trainers and other electronic apparatus. Including electronic instruments for nuclear application and nucleonic instruments from the scientific instruments and apparatus industry, and other work done on electronic capital equipment.

(1) Includes naval vessels registered as merchant ships.

(2) Gross tonnage (100 cubic feet per g.t.) is the total volume of all the enclosed spaces of a vessel.

(3) The total tonnage specified on ordering vessels differs slightly from total actual measured tonnage on completion.

(4) Vessels are shown for export if they are for other than U.K. registration.

(5) Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.

(6) Modifications and cancellations exceed new orders for the period.

(¹) Wool, hosiery (and other knitted goods), made-up clothing and the spinning, weaving and merchant converting sections of the cotton and man-made fibre industries. (²) The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment. (³) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations.

(¹) Fabrics in million square yards. From January 1967 the figures include non-wool fabrics woven in the wool textile industry. (²) All fibres (other than virgin wool) used in woollen spinning and felting, and hair used in the making of tops. (³) From January 1969 includes the small quantity of semi-worsted yarns which previously was divided between the woollen and worsted yarn headings. (⁴) Excluding stocks held by farmers. Annual figures are at 31 August.

⁽¹⁾ The figures relate to schemes mainly over 5,000 sq. ft. ⁽²⁾ For all projects (new buildings, extensions to existing premises and buildings converted to industrial use) for which industrial development certificates were issued. ⁽³⁾ These regions take in the places designated as Development areas under the Industrial Development Act, 1966: the aggregate figures for the Development areas are shown separately. ⁽⁴⁾ The area of industrial building has, since the introduction of the Industrial Development Act in August 1966, been extended to include all ancillary space for storage, canteens, etc. Prior to that date ancillary space was not counted, except in Scotland, Wales and the Northern region; the figures since that date on the old basis of measurement are estimates of the area which would have been approved under the pre-August 1966 definition. ⁽⁵⁾ For manufacturing industry only (new buildings and extensions to existing premises).

(¹) Excluding building which is wholly financed from private sources. (²) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings 'Primary and secondary' and 'Special schools'. (³) Figures for England and Wales include the value of projects for which specific approval is not required. (⁴) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (⁵) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (⁶) The Scottish figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction. (⁷) The Scottish figures of 'Under construction' and 'Completions' are based on the tender costs. The 'Under construction' and 'Completions' figures exclude the value of approved school projects which in 1968 amounted to £1,377,000 and £207,000 respectively. (⁸) The Scottish figures of projects approved for 'Further education' excludes libraries from 1964.

(¹) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(²) Including new schools brought into partial use before completion.

(³) Extensions, alterations, remodelling and war damage repairs.

(¹) The railway figures are derived from statistics compiled by the British Railways Board and from 1969 include estimated ton mileage of freight carried by B.R.B. on behalf of Freightliners Ltd. and National Carriers Ltd. The annual figures for road transport are estimated from periodic sample enquiries, traffic count data, trends in the goods vehicle population and changes in industrial output. The monthly road transport figures are estimated from traffic count data. Revised monthly figures using provisional results from 200 point manual traffic count data.

(²) Not over 30 cwt. unladen weight.

(¹) The four-weekly averages for each year are computed from calendar year totals.

Source: Ministry of Transport

(²) The reduced fares category includes statutory day returns in the London area. From 29 January 1966 full fares and reduced fares have been combined for London Transport railways. Similarly, the annual figure for 1965 has been combined, with an appropriate revision for 1964.

(³) Season ticket journeys are calculated on the basis of 600 journeys per annum for London Transport, and 540 journeys per annum for British Railways.

British Railways and inland waterways: Freight traffic

Four-weekly totals or averages⁽¹⁾

(2) From January 1969, figures do not include Freight carried on behalf of National Carriers Ltd. and Freightliners Ltd.

(¹) Including net adjustment for recording of exports.

(²) Excluding deliveries of, but including payments for, U.S. military aircraft and missiles.

(³) Assets: increase —, decrease +. Liabilities: Increase +, decrease —.

(⁴) The loss arising from the fact that the Exchange Equalisation Account's forward commitments entered into before devaluation have been recorded as being settled on maturity at the new parity.

(⁵) Includes changes in official holdings of non-convertible currencies.

(⁶) Excludes revaluation to sterling equivalent of official liabilities (+ 6) and U.K. banks' liabilities and claims of 610 at the time of devaluation.

(⁷) Consists of non-sterling countries and international organisations other than I.M.F. Excludes increases in sterling balances resulting from revaluation payments at the time of devaluation—liabilities to central banks denominated in sterling + 119; liabilities to European Monetary Agreement + 2.

(⁸) Excludes the revaluation in sterling terms at the time of devaluation in 1967: assets — 131.

Sources: H.M. Treasury
Bank of England

(1) The parity of sterling changed from £1 to \$2.80 to £1 to \$2.40 on 18 November 1967.

(2) The end June 1969 figure includes 14 of British government securities not previously classified to this series. Hence the implied change in this quarter differs from that shown in Table 143 (continued). The implied changes may also differ from quarter to quarter since the area levels are rounded independently of the total.

(3) Including Rhodesia up to the end of 1965 and Burma up to the end of 1966.

(4) Including Rhodesia from the beginning of 1966 and Burma from the beginning of 1967.

⁽¹⁾ In addition to its lending, the National Loans Fund meets the interest and management charges of the national debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. ⁽²⁾ Electricity Council, North of Scotland Hydro-Electric Board and South of Scotland Electricity Board. ⁽³⁾ British Overseas Airways Corporation, British European Airways Corporation and British Airports Authority. ⁽⁴⁾ Including loans to harbour authorities. ⁽⁵⁾ Loans under the Ship Credit Scheme and to the Shipbuilding Industry Board, housing associations and building societies. ⁽⁶⁾ Loans to Votes for U.S. military aircraft, married quarters for armed forces and Town and County Planning compensation; and lending to Redundancy Fund, Land Commission and Northern Ireland Government.

December							

(1) This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any increase (or plus any decrease) in its holdings of gold and currency reserves.

(2) A negative item represents a surplus, a positive item a deficit.

(3) The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin.

(4) Calculated on the new basis for purposes of comparison.

(5) Adjustment for redemption of government guaranteed stock.

(6) Including transfer of surplus of the death duties surrendered securities account.

(7) Including surrender of final balance on the local loans fund.

(¹) Including some land tax, mineral rights duty, excess profits duty and special contribution, not included under separate headings; these amount to approximately £0.2 million in each of the financial years 1963/64 to 1966/67. Including profits tax, excess profits tax and excess profits from April 1969. (²) Receipts from excess profits tax and excess profits levy amounted to approximately £1 million in each of the years 1962/63 to 1965/66. (³) Payments due in certain cases where the overseas rate exceeds the corporation tax rate (Section 84, Finance Act 1965). The figures relate to calendar months. (⁴) The yearly totals include revisions which cannot be allocated to particular monthly periods.

	December...											

(⁵) The sum of the twelve monthly receipts under certain headings is slightly greater than the total shown for the financial year. This is because the monthly figures include duties ultimately payable to the Isle of Man and adjustments for these are made only at the end of the financial year. (⁶) Including receipts from the 10 per cent regulator on most Customs and Excise duties and on purchase tax, operative (i) from 21 July 1966 to 11 April 1967 and (ii) from 23 November 1968. (⁷) Including receipts from the temporary charge on imports October 1964 to November 1966 less export rebates. (⁸) In September repayments began to be brought to account at an earlier stage. Without change, this figure would have been -7.0.

(1) Figures are not strictly comparable throughout owing to changes in the composition of the clearings. From 12 January 1968 provincial clearings, with the exception of the afternoon clearing at Liverpool, were abolished and transferred to General clearing. From 1 July 1969 all figures are worked on a 5 day week.

(2) Average of Wednesdays. Includes Bank of England notes held by the Scottish and Northern Ireland Banks as cover for their note issues in excess of the authorised circulation.

(3) Months: average of Saturdays in the consecutive four-week periods as published in *The London Gazette* or in *The Belfast Gazette*, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

(4) Excluding coin in the Bank of England, Issue Department.

(5) Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department, and by the London clearing banks, Scottish banks and Northern Ireland banks.

⁽¹⁾ The annual figures are averages of the figures for February, May, August and November.⁽²⁾ Included in Other manufacturing in Northern Ireland.⁽³⁾ The February 1968 figures are affected by the revaluation of foreign currency advances after 18 November 1967, and by the inclusion of several new contributors. Together, these accounted for some £260 million of the increase over the quarter in total advances (U.K. residents+£60 million and overseas residents+£200 million).

(1) Derived from yield-maturity curves fitted by computer; an outline of the method used was given in the *Bank of England Quarterly Bulletin* for March 1967. Taxes are ignored. The yearly figures are averages of end month yields. The monthly figures are averages of Wednesdays.

(2) From 1961 to 1962 stocks with coupons below 3½ per cent were omitted from the calculation of the curves; from January 1963 the limit was 4 per cent and from January 1966 5 per cent. The effect of the break between 1962 and 1963 on the annual averages is negligible; the break in January 1966 causes a drop of 0.06 per cent in the short-dated series but does not affect the medium or long-dated series.

(3) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored.

(4) Averages of daily figures calculated from middle market closing prices.

(5) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

(1) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to April 1967, published in the *Ministry of Labour Gazette* for August 1967.

(2) From and including October 1967 includes (a) dock workers previously on daily or half-daily engagements and (b) postmen.

(3) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 164 which cover all industries.

(1) This index is compiled from the results of a monthly enquiry into total wage and salary earnings. The index has been revised and a full description is given in the *Ministry of Labour Gazette* for March 1967.

(2) The industries included in the enquiry are manufacturing, agriculture, mining, construction, gas, electricity, water, transport and communication and certain miscellaneous services. The coverage of the returns is virtually complete in gas, electricity, coalmining and rail transport. In the remaining sectors, the index is based on returns from a sample of about 7,500 firms having about 5½ million employees. In all, the returns show the earnings of about 60 per cent of the total number of employees in the industries concerned.

(²) England and Wales only. (⁴) Except sea transport and postal services. The indices from October 1966 include British Road Services. (⁵) Consisting of laundries and dry cleaning, motor repairers and garages and the repair of boots and shoes. (⁶) The epidemic of foot and mouth disease prevented visits by Ministry of Agriculture Wages Inspectors to farms in infected and adjacent areas. For this reason there is insufficient information to enable an accurate index for Agriculture to be calculated for this month but the best possible estimate has been used in the compilation of the index for all Industries and Services. (⁷) Provisional.

Source: Department of
Employment
and Productivity

Note: There are fluctuations from month to month due to such factors as bonus payments, seasonal variations in hours worked, loss of overtime pay during holidays, etc. Seasonally adjusted figures for all industries covered are given in the second column of the table. Although the seasonally adjusted figures have been revised and are now based on six years data they cannot be regarded as precise. It is not yet possible to produce reliable seasonal adjustments for the individual industries.

(1) The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The figures relate to the end of the month. A brief note on the method of compilation of the figures is given in the current issue of the *Employment and Productivity Gazette*.

(2) In general, males under 21 and females under 18 years of age.

(3) The term 'Manufacturing industries' covers all industries included in Orders III-XVI of the *Standard Industrial Classification, 1958*.

(1) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(2) The monthly totals in the columns headed 'Increase' and 'Decrease' relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed 'Net increase,' is therefore the overall net increase for the year.

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

December 16 ...												

- (¹) The Cost of Living Advisory Committee recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4.
- (²) Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.
- These are the weights which would have been used in 1968 if expenditure on meals out had been treated as in previous years (see footnote(¹)). The weights actually used are given in the following line.

(1) Based on manufacturers' list prices.

(2) The market-price series are based on prices before the addition of subsidies paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(3) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies paid to producers; those for milk and eggs on prices paid to producers by the marketing boards for these commodities; and that for potatoes on producer prices, sometimes 'supported' by the Potato Marketing Board.

(4) Figures to June 1969 have been adjusted to final deficiency payments.

(5) Maincrop potatoes only.

(6) Based on guaranteed minimum prices to producers at packing station until March 1966, then on B.E.M.B. prices to producers under the Egg Contract Schemes.

(7) Based on net prices to farmers after deduction of subsidy.

(8) Provisional.

(¹) The weighting of the monthly index is based on the pattern of trade in 1961. The method of calculating the import and United Kingdom export unit value index was explained in the *Board of Trade Journal* for 13 September 1963.

(²) United Kingdom export unit value index as a percentage of the import unit value index.

(1) Great Britain. Figures until June 1959 were based on quarterly returns from virtually all cinemas. From July 1959 onwards, figures were estimates based on information relating to a sample of cinemas. From April 1967, figures are based on four-weekly returns submitted regularly to H.M. Customs and Excise by cinemas responsible for approximately 94 per cent of total takings with an estimate for the remainder of the cinemas, which are exempt from four-weekly returns. This estimate is based on an annual Board of Trade inquiry.

(2) As from January 1968 colour licences are listed separately. (3) Manufacturers' sales exclusive of purchase tax. (4) Including medium play and a small number of other types. * Average of five weeks.

(¹) Daily mean air temperature at sea-level.

(²) To convert °Centigrade into °Fahrenheit: multiply by 9, divide by 5, and add 32.
°Fahrenheit into °Centigrade: subtract 32, multiply by 5, and divide by 9.

(³) 1 inch = 25.400 millimetres.
1 millimetre = 0.0394 inches.

CENTRAL STATISTICAL OFFICE

ANNUAL ABSTRACT OF STATISTICS 1969

The ANNUAL ABSTRACT OF STATISTICS contains a selection of the most important statistics covering the economic, industrial and social life of the United Kingdom. The latest edition gives annual figures so far as they are available for the years 1958 to 1968, and in some tables also the early months of 1969. The Abstract contains over 390 tables covering the following subjects:

Agriculture and food	Fisheries	Passenger movement
Balance of payments	Fuel and power	Population
Banking	Housing	Prices
Construction	Industrial production	Retail trade
Climate	Insurance	Transport:
Crime	Labour	Road, rail and air
Education	Materials and manufactures	Shipping
External trade	Migration	Social services
Finance:	National health service	Vital statistics
Home and overseas	National income	Wages and earnings

A special feature is the comparison between the new and the old Standard Industrial Classifications highlighting the changes that have been made.

The Annual Abstract of Statistics, prepared by the Central Statistical Office, is a great boon to anyone who needs instant reference to a wide range of statistics. In many cases the annual figures are presented in greater detail than in the MONTHLY DIGEST OF STATISTICS.

Price £1 17s. 0d. (Postage extra)
